## GT024-700 Endobronchial Blocker Tube

Endobronchial blocker tube is a device which can be inserted down a tracheal tube after tracheal intubation so as to block off the right or left main bronchus of the lungs in order to be able to achieve a controlled one sided ventilation of the lungs in thoracic surgery. The lung tissue distal to the obstruction will collapse, thus allowing the surgeon's view and access to relevant structures within the thoracic cavity. Our blocker tubes are making attempts to achieve the one-sided lung ventilation as an alternative to Double-lumen tubes (DLT) and serve as a choice for pediatric patients as well.  
Size: Standard PU Cuff Type Size (mm) : 5FR, 7FR, 9FR  
Packing: Blister Bag

**GT024-800**  
**Double Lumen Endobronchial tube**

## GT065-100

### Gauze Swabs

All pads are folded by machine, 100% cotton ensures the product soft and adherent. Superior absorbency makes the pads perfect for absorbing blood and exudates. In accordance with the customers' requirements, we can produce different kinds of pads, such as folded and unfolded, with X-ray and non X-ray.

The adherent pads are perfect for operations.

**GT174-100 Ice Bandage**

Ice wrap is a cold bandage which uses a revolutionarily new technique for treating injuiries, muscle pain and strains.  
 This bandage reduces recovery time from injuries by combing both the cooling and compressing process in an easy-to-use way.  
 A specially formulated solution is infused into the elastic bandage thay begins to evaporate upon contacting skin, thereby causes cooling of the applied area. Icewrap reduces swelling and provides sufficient cooling to make it a very effective treatment.

#### Transparent film Rolls

PU adhesive dressing

The PU adhesive dressing is mainly formed by two parts: a base material (PU) and separate paper.

The PU base material is soft, thin and light and mainly used for fixing.

The product is used for the protection of various open injuries.

The product is low in sensitization, excellent in biological compatibility, bacteria-free and high in air permeation, and doesn't irritate or damage the skin nor affect the natural functions of the skin.

 100G, PE+PA, 15x11CM

### Usage:

Find the liquid bag in the ice bag and make it broken and 3 seconds later it will be frozen. Then shake the bag up and down to make the content fully mixed, and the temperature will be depressed below zero by the ice bag in 2 minutes.

### Purpose:

To control and alleviate the sore and pain caused by strain, bruise, pull and burn, also can rapidly remove the pain and discomfort induced by fever, headache, toothache, mosquito bite.

Freeze and keep fresh vegetable, fruit, beer, beverage and food and so on when no cold source available.

### Precaution:

The ice bag can only be used for external medication. If eye or skin should contact the content, it must be washed by clean water thoroughly. If one eats the content by mistake, he must drink enough water, try his best to vomit it and turn to doctor when necessary.

In order to avoid a too low temperature, it should be better to wrap the ice bag with a towel or cotton cloth to begin with. Those who have something wrong with their circulation system should refer to doctor in advance.

### Characteristic:

This product can refrigerate instantly without cold source and be easily used because of portability.
